

GASKET HARDWARE KITS

ETG-Canteq offers a standard product line of Gasket Hardware Kits that contain all the appropriate hardware pieces for a particular flange/gasket assembly. For example, the CPR Full Gasket Kit would contain the appropriate number of bolts, nuts, lock washers, flat washers, and gasket needed for a given CPRF flange size. The CPRF Gasket Kits are available for waveguide sizes WR284 through to WR75, and UG type kits are available for waveguide sizes WR284 through to WR42. See the tables below for corresponding model numbers.

CPR-Full Gasket Kit

Model No	W/G (WR)
C1701-1	284
C1701-2	229
C1701-3	187
C1701-4	159
C1701-5	137
C1701-6	112
C1701-7	90
C1701-8	75

CPR-Half Gasket Kit

Model No	W/G (WR)
C1702-1	284
C1702-2	229
C1702-3	187
C1702-4	159
C1702-5	137
C1702-6	112
C1702-7	90
C1702-8	75

UG Cover Gasket Kit

Model No	W/G (WR)
C1704-1	284
C1704-2	229
C1704-3	187
C1704-4	159
C1704-5	137
C1704-6	112
C1704-7	90
C1704-8	75
C1704-9	62
C1704-10	51
C1704-11	42
C1704-12	34
C1704-13	28

ETG-Canteq also supplies rubber pressurizing gaskets on their own from stock. Call our Sales Department to help you with your Gasket needs

WAVEGUIDE SPACERS (SHIMS)

ETG-Canteq offers a standard product line of fabricated waveguide shims in all waveguide sizes with thickness from 0.125 to 0.500 inches. These shims are used to close a gap between two pieces of waveguide that may have happened in installations due to the accumulations of tolerances. The shims flanges' follow EIA standard dimensions.
